ALLOWANCE

Response to Amendment

1. Applicant's amendment was received on 1/31/06, and has been entered and made of record.

Allowable Subject Matter

2. **Claims 1, 3-21 and 23-31** are allowed. These claims will be renumbered as 1-29.

3. The following is an examiner's statement of reasons for allowance:

Independent claims define a facsimile apparatus having a sleep function and clock adjustment function which only activates in an active condition. The claims distinguish over the prior art in that the facsimile apparatus prevents a failure of the clock adjustment function due to the sleep function. A separate operating device switches the control device to the active condition at a predetermined adjustment time or at a predetermined time before the predetermined adjustment time so that the control device can accurately make the clock adjustment.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Many prior art references teach the concept of switching from the sleep mode to the active mode. However, they fail to suggest the applicant's claimed combinations of activating the apparatus in order to make the clock adjustment at a predetermined adjustment time.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
